## PRO-PELLET

NUTRITION SYSTEM FOR HORSES®

### DESCRIPTION

Specifically formulated and nutritionally balanced for performance horses, as well as yearlings and broodmares.

13% protein, 6% fat, pelleted diet. Ideal for use in 'one feed programs' when it is necessary to meet the needs of multiple life stages.

Pelleted for easy, accurate feeding without sorting.

Energy sources include stabilized rice bran and vegetable oil, balanced with digestible fibers, which may help reduce the incidence of "hot" horses.

### FEEDING DIRECTIONS

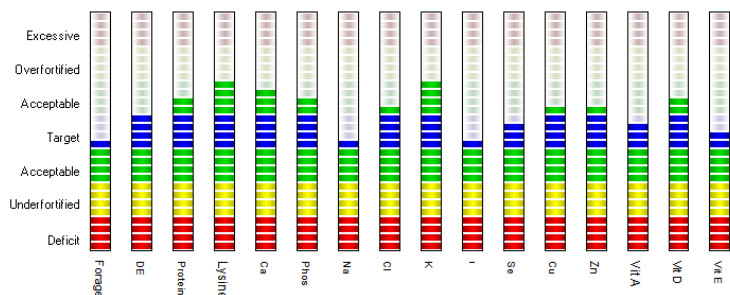

Feed mature idle horses and ponies 0.4–0.6% of body weight per day. Horses and ponies in light work should be fed 0.5–1.0% of body weight, those in moderate work should be fed 0.6–1.1% of body weight and those in heavy work should be fed 0.75–1.25% of body weight. Amount required will depend on horse's activity level, body condition, weight, etc.

- Limit meal size to 0.5 lb per 100 lb body weight.
- Feed in combination with a minimum of 1.0–1.5 lb of good-quality forage per 100 lb body weight per day.
- Allow free-choice access to fresh, clean water and salt.

SIZE OF HORSE	FEED INTAKE PER DAY (LB.)		
	LIGHT WORK	MODERATE WORK	HEAVY WORK
PONY (600 LB.)	3-6	3.5-6.5	4.5-7.5
HORSE (1200 LB.)	6-12	7-13	9-15
LARGE HORSE (1400 LB.)	7-14	8.5-15.5	10.5-17.5

### SAMPLE DIET

Weight: 1200 lb. Equus Pro-Pellet 6 lb.  
Activity: Light Work Grass Hay 18 lb.
